

Porreca
illuminazione

Oggi come nel 1920, dopo tre generazioni, progettiamo e realizziamo i nostri prodotti internamente con metodologie artigianali e maestranze esperte che lavorano sapientemente materiali nobili come l'ottone e le fusioni in ottone nonché l'uso di componenti e diffusori di qualità o completamento del prodotto finito. Pertanto, la Qualità, lo Stile e la Cura nei dettagli delle nostre creazioni lo identificano a livello internazionale come vero Made in Italy.

La Porreca è lieta di presentare il nuovo catalogo con una nuova veste grafica e ricco di informazioni, rivolgendosi con attenzione alle culture e stili di vita dei mercati locali ed esteri e proponendo apparecchi illuminanti in risposta alle continue esigenze ed evoluzioni dei vari scenari.

Tutto ciò grazie anche alla disponibilità e flessibilità che la Porreca mette a disposizione dei propri Clienti, cercando di soddisfarli sia nella Qualità e Innovazione dei materiali che nel Design del prodotto finale.

Today, as in 1920, after three generations, we design and build our products internally with traditional methods and experienced craftsmen who skilfully work with noble materials such as brass and brass fusions as well as the use of quality components to complete the finished product.

Therefore, Quality, Style and Care in the details of our creations identify it at an international level as true "Made in Italy" one.

Porreca is glad to present its new catalogue with a new graphic layout and rich information, carefully addressing the cultures and lifestyles of local and foreign markets and proposing light devices in response to the ever-changing needs and evolutions of the various scenarios.

All this is also due to the availability and flexibility that Porreca offers to its Customers, trying to satisfy them both in the Quality and Innovation of Materials and in the Design of the Final Product.

WEEE (Waste of Electrical and Electronic Equipment)

The Waste Electrical and Electronic Equipment Directive (WEEE Directive: 2002/96/EC and 2003/108/EC) aims to minimise the impact of electrical and electronic goods on the environment, by increasing re-use and recycling and reducing the amount of WEEE going to landfill.

The crossed bin symbol on the equipment indicates that the product, at the end of its useful life, must be collected separately from other household waste according to the return and collection systems available in every single Country must be used.

The adequate separate collection for the subsequent start-up of the equipment sent to be recycled, treated and disposal of in an environmentally compatible way contributes to preventing possible negative effects on the environment and health and optimises the recycling and reuse of components making up the apparatus.

Abusive disposal of the product by the user involves application of the administrative sanctions according to the law in force.
